Goat milk derivatives are the products manufactured by goat milk. Goat milk is derived from goat and is widely consumed by the people living in APAC regions. The adoption of the vegan diet and increase in lactose-intolerant people are the growth deterrents affecting the market whereas the properties of goat milk such as rich in fatty acids and calcium, a nutritional value equivalent to human milk, easy to digest by infants and increase in government aids towards dairy industries are some of the factors affecting the growth of the market.
