Abstracts

Glass fiber-reinforced epoxy (GRE) pipe consists of epoxy resin as a polymer matrix and glass fiber as reinforcement. GRE pipes are majorly used for medium-to-high-pressure oilfield and industrial applications that are operating in harsh environments, such as exposure to corrosive or chemically aggressive fluids or gases. GRE pipes are highly resistant to corrosion, caused by saltwater, chemicals, residues, and bacteria.

According to QYResearch's new survey, global GRE (Glass Fiber-Reinforced Epoxy) Pipe market is projected to reach US\$ 2770.6 million in 2029, increasing from US\$ 1753 million in 2022, with the CAGR of 6.8% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole GRE (Glass Fiber-Reinforced Epoxy) Pipe market research.

Oil prices have experienced significant volatility in recent years. Factors such as geopolitical tensions, global supply-demand dynamics, production cuts, and economic conditions impact oil prices. The COVID-19 pandemic, in particular, caused a sharp decline in demand and prices, followed by a gradual recovery as economies reopen and demand picks up. The global energy landscape is undergoing a transition towards cleaner and more sustainable sources of energy. This transition is driven by factors such as climate change concerns, renewable energy advancements, and government policies promoting decarbonization. Oil and gas companies are increasingly diversifying their portfolios to include renewable energy sources and investing in low-carbon technologies. Oil and gas companies are focusing on improving operational efficiency and reducing costs. Technologies such as data analytics, artificial intelligence, and automation are being employed to optimize production, enhance asset performance, and streamline operations. Energy efficiency measures are also being adopted to

reduce environmental impact and improve sustainability.
