Abstracts

A Gyrocopter – also known as an autogyro – is an aircraft that optically resembles a helicopter. Contrary to a helicopter, a gyrocopter also features a propeller that provides forward thrust. And unlike a helicopter, the gyrocopter's rotor is not engine-powered during flight, but merely passively powered by airstream that results from the forward propulsion. This is the so-called autorotation. Because of their lightweight and compact construction, gyrocopters are classified as Ultralight Aircrafts, which leads to considerable cost advantages of flight operations and also with regard to obtaining a flight license.

The high-qualified nature of the global gyrocopters market accounts for the clear dominance of well-entrenched players that operate in international markets. This poses challenge for small players that compete with large players with respect to quality, safety, functionalities, and services. The use of newer technologies by large players to add qualitative value to existing products will further add to the woes of small players. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Gyrocopters 4900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Gyrocopters 4900 industry.
