Abstracts

Helium Liquefier is a device for converting helium into liquid. It is usually used with equipment of recovery and purification. It is an open system which produces a liquid output and requires an equivalent quantity of feed gas as input. The mass flow rates involved in the respective refrigeration process are asymmetric.

China is the largest countries of Helium Liquefier in Asia in the past few years and it will keep increasing in the next few years. China market took up about 46.7% the Asia market in 2017, while Southeast Asia and Japan were about 30.8%, 10.1%.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Helium Liquefier 4900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.
