## Abstracts

This report studies the global Hemoperfusion production market status and forecast, categorizes the global Hemoperfusion production market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Hemoperfusion is a treatment technique in which large volumes of the patient's blood are passed over an adsorbent substance in order to remove toxic substances from the blood. Adsorption is a process in which molecules or particles of one substance are attracted to the surface of a solid material and held there. These solid materials are called sorbents. Hemoperfusion is sometimes described as an extracorporeal form of treatment because the blood is pumped through a device outside the patient's body. In this report, we calculate medical consumables of hemoperfusion.

Hemoperfusion production has relatively high technology barrier and is technology intensive industry. The main market players are Baxter (Gambro), Asahi, Kaneka, Toray Medical, etc. The production of hemoperfusion will increase to 1451 K Units in 2016 from 936 K Units in 2011 with average growth rate of 9.17%.

Hemoperfusion mainly has two types, which include charcoal hemoperfusion and certain resins hemoperfusion. With medical effect of hemoperfusion, the downstream application industries will need more hemoperfusion products.

The major raw materials for hemoperfusion are polypropylene, polycarbonate, membrane materials, activated carbon, etc. Fluctuations in the price of the upstream product will impact on the production cost of hemoperfusion, and then impact the price of hemoperfusion. The production cost of hemoperfusion is also an important factor which could impact the price of hemoperfusion. The hemoperfusion manufacturers are trying to produce many more types of hemoperfusion for other different diseases.

We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents decreasing trend according to the economy development status and international competition. Also, there will be decreasing trend in gross margin.

The global Hemoperfusion production market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
