## Abstracts

Herbal extract is based on herbs as raw materials in accordance with the needs of the extracted ground, through physical and chemical extraction and separation process, directed to obtain and concentration herbs in one or a variety of active ingredients, without changing its active ingredient structure and formation of products.

For development, milk thistle and saw palmetto have been in the popular herbal supplements and remedies list for many years. For the past years, fast development has been witnessed in saw palmetto and milk thistle market, while in the future. We suggest that the growing of these two markets would still be in progress, but with more modest speed. The production of horse chestnut grows evenly during the following years, due to people's less attention on function of horse chestnut. Comparatively, pygeum is more popular than the above three products. However, the rare of raw material source hinders the development of pygeum extracts. Basically, the development of pygeum rivals milk thistle and saw palmetto these years.

For the market, Europe is the biggest market of herbal extracts, followed by United States. Each year, large amount of herbs and herbal extracts are imported to Europe and United States, to satisfy the growing demand of herbal supplements and remedies in these areas. Since pygeum is only produced in Africa, Europe and China manufactures imports pygeum from Africa, and provides pygeum extracts to Europe and United States market; saw palmetto is mostly grown in United States, also mostly consumed in United States; Europe is the biggest market of milk thistle extracts, followed closely by United States; Also, Europe is the biggest production base and market of horse chestnut.

For manufactures, the herbal extract market is relatively concentrated: Martin Bauer is the leading player in global herbal extracts market, with hundreds of products to satisfy the market in Europe and North America. Other leading players like Indena, Euromed and Naturex are also taking an important share in this field. It is worth noting that China

manufacturer has playing an increasing important part in herbal extracts market, exporting products to Europe and North America market. Leading China players are TY Pharmaceutical, Natural Field and Xi'an Herbking.

For trading, the import and export business of herbal extracts is frequent. Since Europe manufacturer produce a major share of global products, Europe companies export considerable amount of products to North America and Australia. China is also an important exporter of herbal extracts, aiming at United States market.

We tend to believe this industry now is close to mature, and the consumption increasing degree will show a slow decline curve. On product prices, the slow downward trend in recent years will maintain in the future, as competition intensifies. Besides, prices gap between different brands will go narrowing gradually. Also, there will be fluctuation in gross margin.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Herbal Extracts 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Herbal Extracts 3900 industry.
