Hoist rings are load-centering eyebolts. They are designed to be rigged from the center or the side and may pivot or swivel. Some hoist rings connect directly to webbing, chain, or shackles. Others have a hook-end rather than a standard bail, eye, or ring.

The industry is expected to remain innovation-led, with frequent acquisitions and strategic alliances adopted as the key strategies by the players to increase their industry presence. Meanwhile, optimize product mix and further develop value-added capabilities to maximize margins.

Price in US and EU is much higher than that of China and other developing countries due to their high quality and powerful functionalities. Developing countries such as China is more likely to attract more investment opportunity for their potential demand. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Even so, the market is intensely competitive. The study group recommends the new entrants just having money but without technical advantage and upstream and downstream support do not to enter into this field.

The global Hoist Rings market is valued at 310 million US\$ in 2017 and will reach 420 million US\$ by the end of 2025, growing at a CAGR of 4.4% during 2018-2025.
