This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Horizontal Belt Filter is a type of Belt Filter.

The belt filter (sometimes called a belt press filter, or belt filter press) is an industrial machine, used for solid/liquid separation processes, particularly the dewatering of sludges in the chemical industry, mining and water treatment.

Horizontal Belt Filters provide high extraction efficiency, low cake moisture, increased production and reduced operating costs while achieving maximum filtration area in comparison to other filter options. Horizontal belt filters maximize cake purity at minimum specific cost.

The Horizontal Belt Filters consumption volume was 375 Units in 2016 and is expected to reach 360 Units in 2017 and 473 Units in 2022, growing at a CAGR of 5.61% from 2017 to 2022. Asia-Pacific's sales volume accounted for the highest market share (39.47%) in 2016, followed by the Europe and North America.

At present, the manufactures of Horizontal Belt Filters are concentrated in North America, Europe, Asia-Pacific and Africa. Europe is the largest production area in the world, which occupied about 39.20% market share in 2016. The following areas are Asia-Pacific and North America. The global leading players in this market are Outotec, FLSmidth, Tongxing, Tennova, BHS Sonthofen, etc.

Despite the presence of competition problems, due to the increasing demand of leading-edge, effective products, investors are still optimistic about this area, the future will still have more new investment enter the field. In the next five years, the consumption volume will keep increasing, as well as the consumption value.

The global Horizontal Belt Filters market is valued at 110 million US\$ in 2017 and will reach 140 million US\$ by the end of 2025, growing at a CAGR of 3.3% during 2018-2025.
