Abstracts

Humic acids are the water soluble organic acids naturally present in soil organic matter. Humic acids are not a single compound, but rather a collection of different molecular weight compounds with similar characteristics. They are usually defined by the process through which they are isolated, rather than by a particular chemical structure. Humic Acid provides a source of soil building carbon.

Raw materials of humic acids include peat, brown coal, weathered coal and others. Raw material resources are abundant. Also manufacture process is mature in this industry. So, there are many manufactures all over the world. Concentration degree in this industry is low. NTS, Humintech, Humic Growth Solutions, Creative Ideas, Omnia Specialities Australia, Canadian Humalite International, Grow More, Humatech, AMCOL International, HCM Agro and Jiloca Industrial are global major manufacturers. Humic acids have many applications in agriculture, animal feed, environmental protection or others. Among all uses, humic acids consumption in agriculture is large, which took a share of 78.10% in 2015. In the future, we predict that agriculture demand for humic acids will continue to increase.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Humic Acid 3900 market in 2020.
