Imitation stone paint is a kind of exterior wall decoration paint similar to marble and granite in effect. It is mainly made of natural stone powder of various colors, and used to produce the effect of stone on the exterior wall of building, so it is also called liquid stone.

According to QYResearch's new survey, global Imitation Stone Paint market is projected to reach US\$ 2287.8 million in 2029, increasing from US\$ 1536 million in 2022, with the CAGR of 5.9% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Imitation Stone Paint market research.

According to our survey, the global paints and coatings market is valued at \$174.3 billion in 2022. The waterborne segment led the market, holding the largest share of over 39%. Increasing spending in the construction industry and consumer preference for eco-friendly products are expected to support the segment's growth beyond the expected period. By 2030, the global construction value is expected to grow by 85% to reach USD 15.5 trillion. The decorative coatings market accounts for approximately 45% of the \$75 billion global paints and coatings market. The demand for paints and coatings in the automotive industry is on the rise due to increased overall vehicle demand and aging vehicles. Paints and coatings for the automotive industry are also evolving. One such development is the use of smart coatings as they offer the potential to significantly improve surface durability while adding additional functions or properties such as self-healing, superhydrophobicity, self-layering, self-sensing, sound insulation, and vibration damping. Key market players PPG BASF Sherwin-Williams Diamond Paints has strengthened its market position by focusing primarily on the construction

and automotive industries.
