## Abstracts

This report studies the global Industrial Refrigeration Equipments market status and forecast, categorizes the global Industrial Refrigeration Equipments market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Industrial refrigeration equipment refers to machines and systems used for industrial refrigeration application, which generally include refrigeration compressor, evaporator unit, industrial rack, heat exchanger and etc.

In the coming years there is forecasted to be stable demand scale for industrial refrigeration equipment in emerging market that is expected to drive the industry development of industrial refrigeration equipment.

Globally, the industrial refrigeration equipment industry market is not that concentrated as the manufacturing technology of industrial refrigeration equipment is mature and is related to lots of equipment. And some enterprises, like Ingersoll Rand, Johnson Controls and Daikin are well-known for the performance of their industrial refrigeration equipment and related services. At the same time, Europe, occupied 25.17% revenue market share in 2016, is remarkable in the global Industrial Refrigeration Equipment industry because of their market share and technology status.

The consumption volume of industrial refrigeration equipment is related to downstream industries and global economy. As there will always be some uncertain in the global economy in the following years, the growth rate of industrial refrigeration equipment industry may not keep that fast. But it is surely forecasted that the market of industrial refrigeration equipment is promising.

The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant

impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on to customers, their results of operations and financial condition would suffer.

The global Industrial Refrigeration Equipments market is valued at 18200 million US\$ in 2017 and will reach 28600 million US\$ by the end of 2025, growing at a CAGR of 5.8% during 2018-2025.
