## Abstracts

This report studies the global Inhalation & Nasal Spray Generic Drugs market status and forecast, categorizes the global Inhalation & Nasal Spray Generic Drugs market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa). Inhalation & Nasal Spray is a kind of drug used to relieve sneezing, runny, stuffy, or itchy nose and itchy, watery eyes caused by hay fever or other allergies.

Market competition is intense among the top 4. The sales of generic inhalers and nasal sprays is expected to increase even further after the release of studies that point to an increase in the number of patients suffering from restrictive and even life-threatening respiratory diseases, such as COPD and asthma. The incredibly high healthcare costs, especially in developed economies, is therefore driving this growing patient pool towards generic drugs.

The global Inhalation & Nasal Spray Generic Drugs market is valued at 7750 million US\$ in 2017 and will reach 11900 million US\$ by the end of 2025, growing at a CAGR of 6.3% during 2018-2025.
