## Abstracts

Intelligent pigging, also known as inline inspection (ILI) or pipeline pigging, is a method used to inspect the condition and integrity of pipelines. It involves using specialized devices called 'pigs' inserted into pipelines and propelled through them using the flow of the transported product or by an external driving mechanism.

According to QYResearch's new survey, global Intelligent Pigs market is projected to reach US\$ 1583.5 million in 2029, increasing from US\$ 1045 million in 2022, with the CAGR of 6.1% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Intelligent Pigs market research.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Pipeline operators are responsible for maintaining smooth functioning of the pipelines. The most important aspect for pipeline operators is maintaining pipeline integrity. Oil & gas pipelines are subject to many problems such as corrosion and wax deposition, which can result in mishaps and directly affect functioning of the pipeline. A pig (pipeline inspection gauge) is a device that can travel through pipelines for inspection and maintenance purposes. Pigs can be used to inspect and clean the pipeline. In-line pigs are used for analysing pipeline condition and provide accurate information about the same. As pipelines transport valuable fluids, overall infrastructure of the pipeline is expensive and needs regular maintenance in order to ensure smooth functioning and longevity. Pipeline operators are investing in pigging technology to aid efficient maintenance of the pipeline infrastructure. Intelligent or smart pigs use electronic chips to record data about condition of the pipeline which is used to analyse and resolve the problem in the pipeline.
