Abstracts

Interior Stains highlight the individual character of woods and add subtle color to all interior wood surfaces. Staining is the best way to protect and preserve wood. Unlike paints, which form a film on the surface, these stains soak into the wood, accenting the wood grain rather than hiding it.

Interior stains contain oil-based stain and water-based stain. In 2015, oil-based stain took about 74.05% of global production. People prefer to use oil-based stain than water-based stain.
