## Abstracts

This report studies the global IQF Vegetable market status and forecast, categorizes the global IQF Vegetable market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

The Individual Quick Freezing (IQF) technology involves vegetables being frozen as individual pieces, which is unlike other freezing processes. Due to this, increased convenience is offered to consumers and thus value of the product gets enhanced. The IQF process of freezing vegetables is far superior to the conventional process. The USP of this technique is that small ice crystals form within the product that help maintain the fresh quality of the product even after the shelf life of the same is extended. Most foods can be preserved for a longer period of time if they employ the IQF process and are kept at a low temperature till they are used.

IQF peas segment is anticipated to register the highest CAGR during the forecast period.

The global IQF Vegetable market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
