This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

IR spectroscopy is the analysis of infrared light interacting with a molecule. This can be analyzed in three ways by measuring absorption, emission and reflection. IR spectroscopy has been a workhorse technique for materials analysis in the laboratory for over seventy years. An infrared spectrum represents a fingerprint of a sample with absorption peaks which correspond to the frequencies of vibrations between the bonds of the atoms making up the material. Because each different material is a unique combination of atoms, no two compounds produce the exact same infrared spectrum. Therefore, IR spectroscopy can result in a positive identification (qualitative analysis) of every different kind of material. In addition, the size of the peaks in the spectrum is a direct indication of the amount of material present. With modern software algorithms, infrared is an excellent tool for quantitative analysis.

North America is the dominate producer of IR spectroscopy, the production is 5288 Units in 2015, accounting for about 52.25% of the total amount, followed by Europe, with the production market share of 20.78%. And Southeast Asia, India, Japan, China are expected to remain the regions with the largest growth potential in the forecast period.

At present, in the foreign industrial developed countries the IR spectroscopy industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in the North America and Europe, accounted for most of the international market share. Meanwhile, these companies have more advanced equipment, strong

R&D capabilities; the technical level is in a leading position. Leading players in IR spectroscopy industry are Thermo Fisher Scientific, PerkinElmer, Shimadzu, Bruker. Thermo Fisher Scientific is the largest manufacturer, with the market share of 20.95% in 2015. The top four companies occupied about 49.58% share of the market in 2015. Pharmaceutical industry accounted for the largest market with about 24.17% of the global consumption for IR spectroscopy in 2015. With over 18.38% market share in the IR spectroscopy market, chemical industry was the second largest application market in 2015.
