Abstracts

Isopentane and Normalpentane Blend contain Isopentane and Normalpentane as the main ingredients. The single principal content is not less than 10%, not more than 90%. Pentane blend is a very fast evaporating hydrocarbon solvent and low in impurities such as sulphur, olefins, benzene and total aromatics. Examples of end uses for this solvent are blowing agent, electronic cleaning and polymerisation.

Mixed pentane is a low-cost blowing agent. Over the past few decades, the technology and development of mixed pentane have not developed by leaps and bounds. In the Asia-Pacific region, EPS is growing faster. The EPS industry in the US and Europe is already quite stable.
