Abstracts

Isoquinoline, a structural isomer of quinolone, is a heterocyclic aromatic organic compound. Both isoquinoline and quinoline are benzopyridines, which are composed of a benzene ring fused to a pyridine ring.

Isoquinoline is widely used to produce praziquantel which can cure diseases caused by blood flukes. With increasing populations who suffer from diseases caused by blood flukes, isoquinoline still has a certain market space. China has become the largest producer of isoquinoline at the moment.

As some praziquantel manufacturers adopt new technology to produce their products and give up isoquinoline as raw material, the isoquinoline market is shrinking with some manufacturers are exiting the industry.

Global production of isoquinoline will decrease to 580 MT in 2015 from 1265 MT in 2010. It is estimated that impacted by alternatives, global demand of isoquinoline will keep decreasing with an average growth rate of -12.34% in the coming five years. In addition, similar with that of globe, the production of isoquinoline in China will decrease from 923 MT in 2010 to 580 MT in 2015, accompanied with an average growth of -12.42% in the coming five years.

We tend to believe that this industry has dim future, considering the current demand. As for product prices, the slow downward trend in recent years will continue in the next few years, due to weak demand. Similarly, there will be fluctuations in gross margin.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Isoquinoline 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight

cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Isoquinoline 3900 industry.
