Abstracts

This report studies the global Kitchen Cabinet market status and forecast, categorizes the global Kitchen Cabinet market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Kitchen cabinets are the built-in furniture installed in many kitchens for storage of food, cooking equipment, and often silverware and dishes for table service. Appliances such as refrigerators, dishwashers, and ovens are often integrated into kitchen cabinetry. Kitchen Furniture production enterprises are much less concentrated than in other industries and most of these are small and medium-sized. As a result of the low industry concentration, there are hardly any brands with strong influence in the market. However, after years of competition, a number of branded enterprises of a certain scale and possessing considerable strength have emerged. In South Korea domestic market, Hanssem takes the largest share of Kitchen Furniture for many years based on its strong sales channel.

Today, Kitchen furniture brands are no longer fighting for first-tier cities but are gradually shifting their focus to the furniture market in second- and third-tier cities. New construction and Kitchen remodeling has also spurred the growth of home marts in second- and third-tier cities. Besides, the market for Kitchen furniture marts and brands is almost saturated in first-tier cities. While the economic and consumption scale is smaller in second- and third-tier cities, the market offers more room for development. So tapping into the medium- and low-end market will become a key marketing strategy.

The global Kitchen Cabinet market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
