Abstracts

This report studies the global Kitchen Hood market status and forecast, categorizes the global Kitchen Hood market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Kitchen Hood is a kitchen appliance to purify the kitchen environment containing a mechanical fan that hangs above the stove or cooktop in the kitchen. It removes airborne grease, combustion products, fumes, smoke, odors, heat, and steam from the air by evacuation of the air and filtration.

First, the concentration degree of Kitchen Hood industry is not high. There are more than one hundreds manufacturers in the world, and high-end products mainly from Germany, America, Italy, and China.

Italy has a long history and unshakable status in this industry, like Elica and Faber (though it is a part of FRANKE now), both have perfect design.

As to Germany, the Bosch Group has become a global leader, who has two main brands (Bosch and Siemens), and several special brands, such as Thermador.

The import and export percent of this industry is high. Chinese products mainly export to Oceania, European, Middle East and Africa, and take a big market share of underdevelopment regions market, like Vietnam, Brazil and Pakistan. Hong Kong is the biggest export market of China, more than 80% of kitchen hoods are from China mainland. On the developed market, like America, Canada, Germany and France, Italy is the empire. Mexico also has a large amount of exports due to its geographic advantage.

We tend to believe this industry now is very mature, and the Consumption increasing degree will show a smooth curve. On product prices, the slow upward trend in recent years will maintain in the future, as competition intensifies, prices gap between different

brands will go narrowing. Similarly, there will be small increase in gross margin.

The global Kitchen Hood market is valued at 7840 million US\$ in 2017 and will reach 10100 million US\$ by the end of 2025, growing at a CAGR of 3.2% during 2018-2025.
