This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

A Label Printing Machine is a computer printer that prints on self-adhesive label material and/or card-stock (tags), which are different from ordinary printers because they need to have special feed mechanisms to handle rolled stock, or tear sheet (fanfold) stock.

The Label Printing Machines industry concentration is relatively high. Top 5 players take above a half of total U.S. market.

The large size and mature economy of the U.S. attracts both native and foreign brands to enhance sales power to enlarge their market share. TSC even acquired Printronix (US) to reinforce its U.S. market in 2015.

U.S. market is very mature, the consumption comes from both new demands and replacement of old products. The replacement rate is higher than that of other market. They always keep with the technology trend. For example, SATO is capitalizing on the re-emergence of RFID in retail and itemized tagging to meet a wider range of client needs.

The global Label Printing Machines market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
