Abstracts

This report studies the global Labeler market status and forecast, categorizes the global Labeler market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Labeler provides automatic labeling and application of a label to a box or a product usually on a conveyor system. They are time stamped, serialized, or require a variation in every label that is applied to the product or shipping box. Any of these scenarios is easily resolved with automatic printing and application of the label.

First, for industry structure analysis, the Labeler industry is relatively concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 45% of the revenue market. Regionally, United States is the biggest production Labeler area, also the leader in the whole Labeler industry.

Second, for price trend analysis, a key variable in the performance of Labeler producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

The global Labeler market is valued at 470 million US\$ in 2017 and will reach 620 million US\$ by the end of 2025, growing at a CAGR of 3.9% during 2018-2025.
