This report studies the global Lactate Esters market status and forecast, categorizes the global Lactate Esters market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Lactate Esters are derivatives of lactic acid. It is commonly used as a solvent or intermediate in pharmaceutical, detergent, coatings, food and fragrance production. The most common types include methyl lactate, ethyl lactate and butyl lactate, etc.

Lactate esters industry is dispersive relatively. Currently, there are several producing companies in the world lactate esters industry. The main market players are Corbion, Galactic, Musashino Chemical Laboratory, Vertec BioSolvents, Godavari Biorefineries, Yancheng Hongtai Bioengineering and Huade Biological Engineering, etc. The production of lactate esters will increase to 34087 MT in 2017 from 26417 MT in 2012 with CAGR of 5.23%. Global lactate esters capacity utilization rate remained at around 63.03% in 2016.

Lactate esters have several types, the common types include methyl lactate, ethyl lactate and butyl lactate, etc. And each type has its own applications respectively. With solvent and intermediate application of lactate esters, the downstream industries will need more lactate esters products. So, lactate esters have a huge market potential in the future. Manufacturers engaged in the industry are trying to produce high purity and good performance lactate esters through improving technology.

The major raw materials for lactate esters are lactic acid, ethanol / methanol / butanol, and other auxiliary chemicals. Fluctuations in the price of the upstream product will impact on the production cost of lactate esters. The production cost of lactate esters is also an important factor which could impact the price of lactate esters.

We tend to believe this industry is a rising industry, and the consumption increasing

degree will show a smooth growth curve. And the price presents decreasing trend according to the economy development status and international competition. Also, there is decreasing trend in gross margin.

The global Lactate Esters market is valued at 92 million US\$ in 2017 and will reach 110 million US\$ by the end of 2025, growing at a CAGR of 2.3% during 2018-2025.
