## Abstracts

This report studies the global Laser Interferometer market status and forecast, categorizes the global Laser Interferometer market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Laser interferometer is a system which uses laser as a source of light because of the high intrinsic brilliance and monochromaticity of laser lights. These systems offer the advantages of nano scale and long distance measurements. Laser interferometers also offer the combination of precise resolution and accuracy which makes it applicable for flat panel inspection, wafer steppers and nano scale micromachining. They were developed for meeting the growing demands of high precision displacement calibration in the automotive and semiconductor industries. However, the precision of these interferometer changes with the way they are used and time. Therefore, they are prone to errors if they are not calibrated on a regular basis.

Laser Interferometer industry concentration is very high, manufacturers are mostly in the North America, Europe and APAC. As for the sales market, Europe output accounted for more than 33.86% of the total output of global Laser Interferometer market in 2016. Renishaw is the world leading manufacturer in global Laser Interferometer market with the market share of 66.49%, in terms of sales, followed by Agilent(Keysight), Optodyne, API and JENAer.

With the increasing in production capacity, expected that the Laser Interferometer raw material price will be stable in the short term. However, the improvement of energy, transportation costs, and labor costs, will play a significant role in promoting the cost of Laser Interferometer.

The global Laser Interferometer market is valued at 130 million US\$ in 2017 and will
