Abstracts

This report studies the global LCD TV Panel market status and forecast, categorizes the global LCD TV Panel market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

LCD displays utilize two sheets of polarizing material with a liquid crystal solution between them. An electric current passed through the liquid causes the crystals to align so that light cannot pass through them. Each crystal, therefore, is like a shutter, either allowing light to pass through or blocking the light. LCD panel is the key components of LCD display. And the price trends of LCD panel directly affect the price of liquid crystal displays. LCD panel consists of several components: Glass substrate, drive electronics, polarizers, color filters etc. Only LCD panel applied for TV will be counted in this report. Samsung Display, LG Display, Innolux Corp and AUO captured the top four revenue share spots in the LCD TV Panel market in 2015. Samsung Display dominated with 22.11 percent revenue share, followed by LG Display with 19.72 percent revenue share and Innolux Corp Display with 19.30 percent revenue share.

The global LCD TV Panel market is valued at 48800 million US\$ in 2017 and will reach 57000 million US\$ by the end of 2025, growing at a CAGR of 2.2% during 2018-2025.
