Abstracts

This report studies the global LED Backlight Display Driver Ics market status and forecast, categorizes the global LED Backlight Display Driver Ics market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

The liquid crystal display itself is a non-active light-emitting element that must be illuminated with a backlight Display Driver ICs to read the image of the panel.

The region hosts many large consumer electronics and mobile computing device manufacturers, including prominent OEMs and ODMs such as Xiaomi, Samsung, LG, HTC, ZTE, Huawei, Lenovo, Acer, ASUS, and Sony. With the rising demand for high picture quality and improved efficiency systems, LED backlight DDICs are employed in the BLU of these devices.

The demand for LED backlight DDICs in developing countries is expected to drive the global market. The smartphone market in China and India is the largest in the world and is expected to drive sales of connected devices after the rollout of long-term evolution (LTE) and the ongoing trend of the Internet of Things (IoT).

“China is quickly emerging as a leading hub for LCD display manufacturers. The rising number of display device manufacturers in the country is mainly attributed to the availability of abundant resources and low-cost labor. The growing disposable income of people in APAC countries, along with the declining end-product prices, have increased the demand for such devices in the domestic market. The overall demand for consumer electronics in this region indirectly support the demand for LED backlight DDICs,” said Asif.

The presence of prominent automotive infotainment manufacturers in APAC makes the region a leader in the global LED backlight DDICs market. Companies such as Alpine, Denso, Fijitsu, Panasonic, and Pioneer manufacture automotive infotainment systems

such as navigation systems and other in-vehicle entertainment devices, which incorporate LED backlight DDICs in their BLU.

The global LED Backlight Display Driver Ics market is valued at 1740 million US\$ in 2017 and will reach 2570 million US\$ by the end of 2025, growing at a CAGR of 5.7% during 2018-2025.
