Abstracts

This report studies the LED Production Equipment market status and outlook of global and major regions, from angles of manufacturers, regions, product types and end industries; this report analyzes the top manufacturers in global and major regions, and splits the LED Production Equipment market by product type and applications/end industries.

The global LED Production Equipment market is valued at USD 1296.9 million in 2016 and is expected to reach USD 1811.7 million by the end of 2022, growing at a CAGR of 5.73% between 2016 and 2022.

LED lighting is gaining in popularity, and in turn, high demand globally. The majority of the growth is derived from general lighting applications where LEDs are used for applications such as commercial, industrial, outdoor, and residential lighting. The increasing demand from these applications segments is a key factor contributing to market growth.

Some of the regulations and policies imposed by governments of countries such as China and Taiwan favoring the adoption and production of LEDs is expected to drive LED production. As a result of this strong support from governments, these countries have witnessed an increase in investments, an increase in the number of fab facilities, as well as an increase in the sales of LED lamps domestically.
