An Light Intensity Meter,also call Illuminance Meter or Light Meter,which is a measuring instrument designed for measuring the intensity of your lighting systems and measure illuminances in areas like workplaces, field of cinematography and scenic design, general field of lighting, etc
At present, in the foreign industrial developed countries the Light Intensity Meter industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in the china. Chinese manufacturers take large portion of low-end product.Meanwhile, foreign companies have more mature equipment, strong R & D capability, the technical level is in a leading position. But foreign companies' manufacturing cost is relatively high, compared with china's companies, the manufacturing cost is disadvantage. As the China's Light Intensity Meter manufacturers production technology continues to improve, their share in the international market is increasing, competitiveness in the international market gradually increase.
Light Intensity Meter industry is in a decreasing trend for the slow growth of downstream demand, It also face the risk of substituting by multi-function light intensity meter.At many foreign manufacturers have droped out their old product and keep development in the new multi-function light intensity meter product.

The global Light Intensity Meter market is valued at xx million US$ in 2017 and will reach xx million US$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
