Lipstick Packaging refers to cosmetic containers or tubs for packaging of lipstick products. Materials used for Lipstick Packaging are mainly Aluminum and various kind of plastic materials. Other materials like bamboo, paper, Platinum and silver, thick wall glass are also but very less used.

The political and economic climate of a country is reflected in women's mouths, says the son of cosmetics entrepreneur Estée Lauder. A strong, unique, and sophisticated color cosmetic package is the key to attract consumer and cultivates brand value.

Unlike other beauty and skincare products, consumers who shop for color cosmetics are more likely attracted to the packages speaking to them at the point of purchase rather than choosing a brand. This is an advantage and a challenge for brands to find their market share in the highly competitive environment.

Lipstick Packaging market consumption is highly impacted by the downstream consumers, lipstick manufactures play very import roles in lipstick packaging production. Upstream raw materials are affecting the price and gross profit of lipstick packaging products
