This report studies the global Liquid Ammonium Thiosulfate market status and forecast, categorizes the global Liquid Ammonium Thiosulfate market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Ammonium thiosulfate (CAS No: 7783-18-8; Chemical Formula: $H_8N_2O_3S_2$) is white crystalline solid with ammonia odor, readily soluble in water, slightly soluble in acetone and insoluble in ethanol and diethyl ether. It is an inorganic compound.

Commonly, ammonium thiosulfate (ATS) is a clear liquid containing 12% N and 26% S. ATS is compatible with Nitrogen solutions and NPK liquid blends, which are neutral or slightly acid in reaction. It is widely accepted for use in clear liquid blends, but is also well suited for use in suspensions.

As of 2016, the USA Liquid Ammonium Thiosulfate consumption represents about 1035.7 K MT, about 75% of global Liquid Ammonium Thiosulfate demand. Regionally, the Middle West region is the biggest consumption region of Liquid Ammonium Thiosulfate in USA, which mainly concentrates in the Great Lakes region. Main part of demand comes from Iowa, Nebraska and Illinois. In South area, Texas is also a major consumption region of Liquid Ammonium Thiosulfate, which takes more than 14% of production in South region. Comparatively, the production and demand in West region and Northeast region are relatively small, but the distribution centers in West regions, especially in Colorado and California, can satisfy the need of local area.

Tessengerlo Group is the leading company in USA Liquid Ammonium Thiosulfate industry which supplies products accounts for more than 43.67% of USA market.

Though Tessenderlo Group ATS products is distributed around the world, it Liquid Ammonium Thiosulfates are mainly manufactured in USA. The following players in this field are Martin Midstream Partners and Poole Chem, the production amount of which

are much lower, though. Generally, the Liquid Ammonium Thiosulfate industry is concentrated compared with the general fertilizer solution market, but still quite fragmented. The sales revenue of medium sized players are rather even and looks small compared with leading players like Tessenderlo Group. It is the profound supply chain and raw material source that made Tessenderlo Group a leader. The end use of Liquid Ammonium Thiosulfate is fragmented in terms of plant types, among which, corn, wheat and fruits are the major applications. It is estimated that the growth in cash crops would be met with rapid increase due to the growing attention in relative industry. Also, traditional Liquid Ammonium Thiosulfates that used in corn plantation application would still be the steady usage.

The global Liquid Ammonium Thiosulfate market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
