## Abstracts

This report studies the global Liquid Crystal Polymer market status and forecast, categorizes the global Liquid Crystal Polymer market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

LCPs (Liquid Crystal Polymers) are partially crystalline aromatic polyesters based on p-hydroxybenzoic acid and related monomers. LCPs form areas of highly ordered structures when in the liquid phase but the degree of order is less than that of a regular solid crystal. LCPs are fire resistant at high temperatures and chemically resistant in very thin walled applications. LCPs are typically used for medical applications, including trays and drug delivery systems, and in diagnostics for the automotive and telecommunication industries.

Currently, LCP is still a high-end engineering plastics, compared to traditional engineering plastics, it has an absolute performance advantage, it is possible for few to manufacture the product, which leads to downstream consumer of bargaining power is not high, but upstream raw materials declining year by year, LCP product prices have reduced, but only slightly.

The main areas of application for LCP are automotive and electronics fields, including aerospace electronic devices, especially the higher margin areas, and therefore, Gradually, some manufacturers enter the field, but the product performance and stability there is a gap, resulting from market share rate is not high. While the development is relatively slow.

On the point of downstream consumer market, China is a big market, while developing very rapidly, especially China's automobile industry and the electronics industry has become the second largest market. it led the development of a large number of downstream manufacturing companies.

The global Liquid Crystal Polymer market is valued at 1120 million US\$ in 2017 and will reach 1330 million US\$ by the end of 2025, growing at a CAGR of 2.2% during 2018-2025.
