## Abstracts

This report studies the global Lithium Hydroxide market status and forecast, categorizes the global Lithium Hydroxide market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Lithium hydroxide is a compound formed of the white, soft metal lithium bound to a hydroxide group with the formula  $\text{LiOH}$ . It is commercially available in anhydrous form free of chemical bonds to water, though it is a hygroscopic chemical by nature that is also sold in monohydrate form as  $\text{LiOH} \cdot \text{H}_2\text{O}$ . The compound is used in a variety of industries with popular commercial demands for it in the manufacture of lithium batteries and as lithium hydroxide monohydrate to make lubricating greases.

The major raw materials for lithium hydroxide monohydrate are Lithium ore, HCl and others. Fluctuations in the price of the upstream product will impact on the production cost of lithium hydroxide monohydrate, and then impact the price of lithium hydroxide monohydrate. Additionally, the quality of raw materials would also impact the quality of lithium hydroxide monohydrate.

We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents a downward trend according to the economy development status. Also, there will be fluctuation in gross margin.

The global Lithium Hydroxide market is valued at 350 million US\$ in 2017 and will reach 700 million US\$ by the end of 2025, growing at a CAGR of 10.6% during 2018-2025.
