This report studies the global LNG as a Bunker Fuel market status and forecast, categorizes the global LNG as a Bunker Fuel market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Liquefied natural gas (LNG) is natural gas (predominantly methane, CH₄) that has been converted to liquid form for ease of storage or transport.

First, the LNG as a bunker fuel industry is concentrated around the ECA territories in the world, both on supply and consumption market, especially Northern Europe (Norway). These years, the North America and East Asia have generally shown attention to the potential for LNG as a bunker fuel, especially in South Korea Japan and China.

Second, in the world wide, the LNG powered ships usually sail on the sea, but for China, it is mostly distributed on the river. China government puts a lot of effort on LNG as a bunker fuel project since 2010, and now comes out a few good results, but due to the higher conversion and new construction fees, belonging with the fledgling bunker fuel network system, now the LNG as a bunker fuel industry is still holding on for the large range development.

Third, company mergers and acquisitions, and inter-companies cooperation have occurred for development and growth, also there are many companies adding investment on LNG bunker and LNG powered ship industry. All of them indicates and promotes the healthy develop trend of LNG as a bunker fuel industry.

Fourth, this industry is affected by the economy and policy, so it's important to put an eye to economic indexes and leaders' prefer. With the global economic recovery, more and more people pay attention to rising environment standards, especially in the likely ECA territories, the need of LNG as a bunker fuel will increase.

Fifth, we tend to believe this industry now is still on a rapid develop period, and the consumption increasing degree will show a fast grow curve. On product prices, the slight fluctuation trend in recent years will maintain in the future. With the technology of LNG ship motor development, the demand market of LNG as a bunker fuel will be brighter.

The global LNG as a Bunker Fuel market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
