Abstracts

This report studies the global Low and Medium-voltage Inverter market status and forecast, categorizes the global Low and Medium-voltage Inverter market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Low and Medium-voltage Inverter is an electronic device or circuitry that changes direct current (DC) to alternating current (AC). The input voltage, output voltage and frequency, and overall power handling depend on the design of the specific device or circuitry. The inverter does not produce any power; the power is provided by the DC source.

First, for industry structure analysis, the Low and Medium-voltage Inverter industry is relatively concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 55 % of the revenue market. Regionally, Europe is the biggest production value area of valves, also the leader in the whole Low and Medium-voltage Inverter industry.

Second, for price trend analysis, a key variable in the performance of Low and Medium-voltage Inverter producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

Third, for forecast, the global Low and Medium-voltage Inverter revenue would keep increasing with annual growth rate with 3~6%. We tend to believe that this industry still has a good future, considering the current demand of Low and Medium-voltage Inverter.

The global Low and Medium-voltage Inverter market is valued at 10900 million US\$ in 2017 and will reach 14500 million US\$ by the end of 2025, growing at a CAGR of 4.2% during 2018-2025.
