This report studies the global Low Pressure Molding with Polyamides market status and forecast, categorizes the global Low Pressure Molding with Polyamides market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Low pressure molding with polyamides is a process typically used to encapsulate and environmentally protect electronic components (such as circuit boards). The purpose is to protect electronics against moisture, dust dirt and vibration. It is also used for sealing connectors and molding grommets and strain reliefs.

Currently, the concentration degree in the industry is very high. The major market players are Henkel AG, Bostik, with the total production market share of 90.59% in 2016.

In consumption market, the growth rate of global consumption is smooth relatively. North America and Europe are still the major consumption regions due to the advanced production technology and rapid development of economy.

The classification of low pressure molding with polyamides, according to the color, includes black polyamides, amber polyamides, etc. It can be widely used in many industries. Survey results showed that 49.42% of the low pressure molding with polyamides went into the electronics industry in 2016, followed by automotive industry, which accounted for 33.06% share.

The major raw material for low pressure molding with polyamides is dimer acid, diamines, etc. Supply of raw materials is sufficient globally. The technology issue limits the development of low pressure molding with polyamides market.

Information revealed that, manufacturers from Europe are the major leaders in the market of low pressure molding with polyamides. Manufacturers from developing

countries, such as China, are facing immature technology. There is large space of product quality and price among Chinese manufacturers and European ones. It is estimated that the low pressure molding with polyamides industry is promising, considering the downstream demand. Once the technology barrier is broken, more and more companies will enter into the industry. And then, with sufficient supply, price will go down further in the future.

The global Low Pressure Molding with Polyamides market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
