## Abstracts

This report studies the global Magnetic Bearings market status and forecast, categorizes the global Magnetic Bearings market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

A magnetic bearing is a bearing that supports a load using magnetic levitation. Magnetic bearings support moving parts without physical contact. For instance, they are able to levitate a rotating shaft and permit relative motion with very low friction and no mechanical wear. Magnetic bearings support the highest speeds of all kinds of bearing and have no maximum relative speed.

Magnetic bearing technology is becoming more and more important as an alternative to conventional bearing supports, and is used when the technical requirements can no longer be fulfilled by other bearing types. This especially applies to industrial machinery with very high rotational speeds and shaft weights of up to several tons.

As Chinese overall economic downward trend in the past few years, and international economic situation is complicated, in the next few years there will be many uncertainties coupled with the Magnetic Bearings industry. In short supply to the market in the past few years, more and more companies enter into Magnetic Bearings industry.

In Magnetic Bearings product demand market is a fast-growing market, but at present consumption areas are mainly concentrated in Europe and other developed countries. As large demand of advanced products at home and abroad, many companies began to enter this field. Although sales of Magnetic Bearings brought a lot of opportunities, the study group recommends the new entrants just having money is not enough without technical advantage and downstream support do not enter Magnetic Bearings field.

The global Magnetic Bearings market is valued at 2730 million US\$ in 2017 and will

reach 4650 million US\$ by the end of 2025, growing at a CAGR of 6.9% during 2018-2025.
