Abstracts

This report studies the global Malic Acid market status and forecast, categorizes the global Malic Acid market size (value & volume) by manufacturers, type, application, and region.

This report focuses on the top manufacturers in North America, Europe, Japan, China and other regions (India, Southeast Asia, Central & South America, and Middle East & Africa).

Malic acid is an organic compound with the formula $C_4H_6O_5$. It is a dicarboxylic acid that is made by all living organisms, contributes to the pleasantly sour taste of fruits, and is used as a food additive. Malic acid has two stereoisomeric forms. Malic acid is in three forms in nature, i.e. D-malic acid, L-malic acid and their mixtures DL-malic acid. It's a white crystal or crystalline powder. It has strong moisture absorption, soluble in water and ethanol.

In consumption market, the global sales value increases with the 0.38% average growth rate. North America and China are the mainly consumption regions due to the bigger demand of downstream applications.

We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents a downward trend according to the economy development status. Also, there will be fluctuation in gross margin.

The global Malic Acid market is valued at 290 million US\$ in 2017 and will reach 320 million US\$ by the end of 2025, growing at a CAGR of 1.2% during 2018-2025.
