Abstracts

This report studies the global Mascaras market status and forecast, categorizes the global Mascaras market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Mascara is a cosmetic commonly used to enhance the eyelashes. It may darken, thicken, lengthen, and/or define the eyelashes. Normally in one of three forms—liquid, cake, or cream—the modern mascara product has various formulas; however, most contain the same basic components of pigments, oils, waxes, and preservatives.

With the improved standards of living, the demand for Mascara is expected to fuel the Mascara market in cosmetic industries. Mascara's ingredients typically include a carbon black or iron oxide pigment to darken lashes; a polymer to form a film that coats lashes; a preservative; and thickening waxes or oils such as lanolin, mineral oil, paraffin, petrolatum, castor oil, carnauba wax, and candelilla wax. Mascara coats the lashes with the pigment and other ingredients to make the lashes stand out. Different formulas and different brush types can give different results; for example, lengthening mascaras may coat the lashes with polymers to create a smoother, longer look from root to tip; thickening formulas may include plumping agents to make each lash look fuller.

The global Mascaras market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
