## Abstracts

This report studies the global Master Alloy market status and forecast, categorizes the global Master Alloy market size (value & volume) by manufacturers, type, application, and region.

This report focuses on the top manufacturers in North America, Europe, Japan, China and other regions (India, Southeast Asia, Central & South America, and Middle East & Africa).

Master alloy is a base metal such as aluminium, copper and other products, which combines with a certain percentage of one or two other elements. It is a semi-finished product and is produced in various shapes (ingot, waffle plate, rod in coils, etc).

The key raw materials of master alloy are nonferrous metals, such as aluminium, copper, vanadium, titanium, niobium, and so on. The price fluctuations of raw materials will impact the master alloy industry directly and deeply. The price of master alloys shows continuous down trend in the recent few years. Moreover, the price level varies largely according to the ingredients of master alloys.

The global Master Alloy market is valued at 3310 million US\$ in 2017 and will reach 3310 million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
