## Abstracts

With the development of the medical equipment and various demands from the patient, there are coming more and more categories of multi-function and specialized medical beds. Medical Bed researched in this report includes: Med/Surg Hospital Bed; Home Care Bed; Long Term Care/Rehab Bed; Bariatric Bed; Critical Care Beds. In this report, we divide the medical beds into five types: Maternity Bed, Critical care bed, Medical surgical bed, Long term care bed and other; at the same time we divide the medical beds into three applications: Home care bed, Hospital bed and other.

Over the long term, overall patient and provider demand for health care products and services will continue to grow as a result of a number of factors, including an aging population, longer life expectancies, and an increasing number of sicker patients across all care settings, including hospitals, extended care facilities and in the home.

The monopoly power of the leader companies will enhance a lot. The Hill-Rom have made several recent acquisitions, most notably the acquisitions of Welch Allyn Holdings, Inc. ("Welch Allyn"), Trumpf Medical ("Trumpf"), and Virtus, Inc. ("Virtus"), and we plan to make additional acquisitions in the future.

There are growing desire demand among developing countries to Invest in Health Care. While industry growth rates in more mature geographic regions such as western and northern Europe and Japan have moderated, in many other geographic markets, where the relative spending on health care is increasing, we expect long-term increasing demand for medical technologies. New hospital construction and hospital refurbishments are expected in regions such as Latin America, the Middle East and many parts of Asia. This could increase overall demand for our products and services. Acuties and Technological Impact is changing. As a result of the growing population of the elderly and obese, health care systems are challenged to treat rising incidences of complex diseases and conditions such as diabetes, congestive heart failure and respiratory disease.

As a conclusion, there will be slow growth in the demands of the medical beds in North America, and the America and the Canada, especially America will control the whole

North America market. Even the Mexico has a big population, there is nearly no players in medical beds industry, and the demand quantity is very small. The monopoly will make more barriers to the new players. And the technology will be the decisive factors to the stability of the developing of the players.
