This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Medical Device Connectivity is the establishment and maintenance of a connection through which data is transferred between a medical device, such as a patient monitor, and an information system.

Medical devices may be connected on wireless and wired networks. Wireless networks, including Wi-Fi, Wireless Medical Telemetry Service, and Bluetooth, provide more ubiquitous coverage of connectivity, allowing uninterrupted monitoring of patients in transit. Wired networks are fast, stable, and highly available. Wired networks are usually more costly to install at first and require ongoing costs for maintenance, but allow connectivity of the organization in a closed environment.

In this report we only include equipment for Medical Device Connectivity not include Software and services.

Market competition is not intense. Cisco Systems, Qualcomm, Philips Healthcare, Infosys, Cerner, TE, GE, Digi International etc. are the leaders of the industry, and they hold key technologies and patents, with high-end customers; have been formed in the monopoly position in the industry.

The global Medical Device Connectivity market is valued at 2010 million US\$ in 2017 and will reach 9640 million US\$ by the end of 2025, growing at a CAGR of 25.1% during 2018-2025.
