An effective medical equipment maintenance program consists of adequate planning, management and implementation. Planning considers the financial, physical and human resources required to adequately implement the maintenance activities. Once the program has been defined, financial, personnel and operational aspects are continually examined and managed to ensure the program continues uninterrupted and improves as necessary. Ultimately, proper implementation of the program is key to ensuring optimal equipment functionality.

A maintenance strategy includes procedures for inspection, as well as preventive and corrective maintenance. Medical equipment maintenance can be divided into two major categories (by strategy): inspection and preventive maintenance (IPM), and corrective maintenance (CM); on the basis of modality, there have advance and primary two segments; by manufactures, there are three types: Single Vendor OEM, Multi-Vendor OEM and Independent Service Organizations.

The medical equipment maintenance market is highly competitive. On the basis of modality, the advanced modality segment dominates the market, with a share of 58% in 2015. The major players include GE, Pantheon, Hitachi, Siemens, Toshiba, Philips, Aramark, Dr?ger, UHS, Fujifilm, Esaote and etc.

Geographically, the medical equipment maintenance market is segmented into North America (45%), Europe (30%), Japan (9%), China (6%), and the Rest of the World. In 2015, North America is expected to dominate the market, followed by Europe. However, Asia is expected to grow at the highest CAGR of 18% each during the forecast period.
