This report studies the global Medical Robotics market status and forecast, categorizes the global Medical Robotics market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Medical Robotics is a robot used in the medical sciences. They include, but are not limited to, surgical robots. These are in most telemanipulators,

Robotics has a long, colorful history, but its applications have only recently impacted the healthcare industry. In 2000, the field's current main player, Intuitive Surgical, was one of the first firms to bring a surgical robot to market. At the time, the company's marketing was centered on remote surgical procedures. However, the ensuing years have seen the applications of this life-changing technology increase exponentially, to the point where the possibilities enabled by today's medical robots are endless. Each "participant" sees added value in this technology: minimal invasiveness for the patient, enhanced microsurgery and precision capabilities for the surgeon, and cost optimization for the healthcare system due to patients' shorter recovery time.

The global Medical Robotics market is valued at 3980 million US\$ in 2017 and will reach 12200 million US\$ by the end of 2025, growing at a CAGR of 15.0% during 2018-2025.
