A healthy skin microbiome protects from pathogens, damage and dryness, and also lead to more radiant and healthy skin. As a matter of fact, the best skincare practice involves limiting the amount of anti-bacterial skincare products and not over-cleansing skin. Additionally, using prebiotic- and probiotic-rich products can have a beneficial effect on our skin by keeping it moisturized and delaying signs of aging. An increasing number of industrials have seized this market opportunity and developed care products adapted to the skin microbiome.
