Abstracts

Microfiber cleaning cloths are a fabulous option for cleaning. The textile that combines poly-amide and polyester provides a very effective surface that actually grabs dust, grime and contaminants off the surface, plus they are very strong, soft and durable at the same time, and people can wash those hundreds of times and they maintain their properties.

The global Microfiber Cleaning Cloths industry is characterized by several large international manufactures and many smaller regional and local manufactures. Therefore, market share concentration is low. The two largest operators account for about 17.46 % of total industry revenue in 2016, most manufactures operate locally and provide services to a small segment of the population. Nonetheless, market share has increased over the past five years because a number of companies were acquired during the recession. Larger companies are looking to expand their footprint in nearby areas, where they can add value and turn once-struggling operations into profitable ventures. Key market players include Toray, Norwex, Eurow, Scotch-Brite and Vileda among others.
