According to QYResearch's new survey, global Mobile X-ray Machines market is projected to reach US\$ 12550 million in 2029, increasing from US\$ 6985 million in 2022, with the CAGR of 8.5% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Mobile X-ray Machines market research.

Technological advancements, the growing geriatric population, the increasing prevalence of vascular diseases, and huge funding for R&D of portable technologies by private players and governments are the major factors driving the market growth. In addition, the government is providing grants for various research projects for X-rays, which is also driving the market growth. For instance, in June 2021, the UK government and the Department of Health and Social Care issued USD 44.03 million to boost AI technologies to revolutionize the National Health Service care. It also reported that nearly 38 new pioneering AI projects were started that may help to revolutionize care and accelerate diagnosis. Therefore, such initiatives may create new opportunities for the market as they may lead to the introduction of technologically advanced portable X-rays. Thus, such favorable initiatives from the government may help to boost the market growth over the forecast period.
