This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Modified silicone fluids are silicone fluids with additional functionality beyond the already fine properties of common dimethyl silicone fluid. This is achieved through the introduction of various organic groups. Depending on the organic group, silicone fluids can be given properties of water-solubility, compatibility or reactivity with various organic materials, paintability, and greater lubricity.

Modified silicone fluids are silicone fluids with additional functionality beyond the already fine properties of common dimethyl silicone fluid. It can be divide into reactive silicone fluid and non-reactive silicone fluid according to types. Reactive silicone fluid is the main type and in 2016 it takes about 80% of global sale volume. And according to application, it can be used into coating, performance additive, construction and consumer care. Now performance additive is the main application, which owns 40.23% of all application.

North America and Europe are the main consumption regions, which take 32.58% and 28.00% in 2016, respectively. Although the share in China is relatively small compared to North America and Europe, the demand in China will be huge in the future for there is largest population country in the world.

The market concentrate is very huge. The main manufacturers in the world are Dow Corning, WACKER, Momentive, Shin Etsu, Bluestar Silicones, BRB International BV, Evonik, BASF and Siltech. The top 3 take 63.69% of global sale volume in 2016.

The global Modified Silicone market is valued at 550 million US\$ in 2017 and will reach 750 million US\$ by the end of 2025, growing at a CAGR of 4.4% during 2018-2025.
