Abstracts

Zinc sulfate is the inorganic compound with the formula $ZnSO_4$ as well as any of three hydrates. It was historically known as 'white vitriol'. It is a powder that is colorless and completely water-soluble that is a common source of soluble zinc ions.

Monohydrate zinc sulfate and heptahydrate zinc sulfate have the same active components, but they differ on the number of water of hydration. Monohydrate zinc sulfate has one molecule of water in its molecular formula while heptahydrate zinc sulfate contains seven molecules of water in its molecular formula. As a result, monohydrate zinc sulfate contains higher active component of zinc which is about 35 – 36% as zinc while heptahydrate zinc sulfate contains about 20 – 22% as zinc. However, because of the difference in the number of water of hydration, heptahydrate zinc sulfate is less stable than monohydrate zinc sulfate because of its ability to absorb water is greater than the latter.

Monohydrate and heptahydrate zinc sulfate are the main types of zinc sulfate. It can be widely used in many industries. Survey results showed that 57.92% of the monohydrate and heptahydrate zinc sulfate market is agriculture and animal husbandry industry, 16.40% is industry application, 12.81% is food industry, 5.62% is pharmaceuticals industry and 7.24% divided among other industries. With the development of economy, these industries will need more monohydrate and heptahydrate zinc sulfate. So, monohydrate and heptahydrate zinc sulfate has a huge market potential in the future. Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Monohydrate and Heptahydrate Zinc Sulfate 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its
