This report studies the global Multiple Rocket Launchers market status and forecast, categorizes the global Multiple Rocket Launchers market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

A multiple rocket launcher (MRL) or multiple launch rocket system (MLRS) is a type of rocket artillery system. Rockets have different capabilities than artillery, like longer range, and different payloads, for example considerably larger warheads, or multiple warheads. Unguided rocket artillery is notoriously inaccurate and slow to reload, compared to artillery. To overcome this, rockets are combined in systems that can launch multiple rockets simultaneously. Modern rockets can use GPS or inertial guidance, to combine the advantages of rockets with high accuracy.

The multiple rocket launcher industry is relatively concentrated: due to the high barriers (technical barriers and material resources), only limited countries are involved in the business. Major manufacturers of multiple rocket launchers are mainly in US, Russia and China.

Multiple rocket launchers downstream is mainly military industry. In recent years, for the reason to restrain the ISIS from destroying the world peace, the demand for multiple rocket launchers will correspondingly increase.

The global Multiple Rocket Launchers market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
