Since last few years, research and development of multiplex molecular diagnostics test in clinical microbiology have allowed many laboratories around the world to grow more rapidly and with ease. This has also helped many of these institution to analyze these pathogens directly using multiplex molecular diagnostics in clinical specimens. Above all, recent developments such as approval from USFDA to analyze multiple organisms in single run is helping the market of molecular diagnostic panels to flourish. Using multiplex molecular diagnostics tools, researchers and laboratory personals are able to identify most common laboratory pathogens in gastrointestinal and respiratory more effectively. The w respiratory viral, gastrointestinal, or central nervous system infections.

According to QYResearch's new survey, global Multiplex Molecular Diagnostic market is projected to reach US\$ 8522.7 million in 2029, increasing from US\$ 5362 million in 2022, with the CAGR of 6.9% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Multiplex Molecular Diagnostic market research.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs. However, the industry also faces challenges such as stringent regulations, high
